

BFS CAPABILITY STATEMENT

CORE COMPETENCIES

Bryant Fuel Systems, LLC (BFS) is a Veteran owned small business with abundant Engineering and Manufacturing capabilities. BFS has been manufacturing high quality, turn-key, rugged terrain tested, above ground fuel delivery systems since 1989. Our systems are in service with every branch of the U.S. Armed Forces at over 60 installations around the world and are in operation at commercial and government sites in 35 states, 2 territories and 21 countries. BFS is a preferred manufacturer for military, commercial and government clients worldwide.

MISSION STATEMENT

To deliver innovative, quality engineered and certified above ground fuel delivery systems to military, commercial and government clients worldwide. We will continue to develop and maintain a world-class customer care organization with accelerated response times and consistent top-gun service. Our clients will value us because we consistently demonstrate integrity, honesty and humility.

PARTNERSHIP EXPERTISE

BFS attributes much of its success to a philosophy of teamwork and partnership. Though we strive to be the best in the industry and are equally competitive, we are willing to engage with good partners who understand the need for cooperation and collaboration in order to serve the highest needs of our clients.

KEY CLIENTS AND SYSTEM SITES (INSTALLATIONS)
